OUR PHILOSOPHY

# WE ARE STUCO!

## SINCE 1898: RESPONSIBILITY THAT LASTS.

At Stuco, we believe in more than just safe footwear – we believe in the right to safety in the workplace and in the value of every individual. For over 125 years, we have stood for protection, comfort and responsibility. Our shoes do more than just protect. They relieve pressure and accompany you – day after day, step by step. Because those who work hard deserve products they can rely on.

### OUR VALUES – RELIABILITY. SUSTAINABILITY. HUMANITY.

As a family-run company, we don't think in terms of quarters, but in terms of generations. We act in a value-oriented manner and take responsibility – for people, for resources, for our environment.

### OUR VISION

With a spirit of innovation, total commitment and uncompromising quality, we develop solutions that really improve everyday working life. Precisely because occupational safety is also a matter of trust, we rely on European manufacturing, fair conditions and products that deliver what they promise.

## HOMEMADE IS BEST

## THAT'S WHY WE MANUFACTURE IN EUROPE

Safety doesn't just start when you wear our shoes – it starts during the manufacturing process. That's why at Stuco, we rely on 100% in-house production within Europe. Our products are developed in Switzerland and manufactured in our own factory in southern Hungary – under fair conditions and with uncompromising quality standards. Every single pair of Stuco safety or work shoes is created there with care, skill and personal responsibility.

**Short distances. Full transparency. Active responsibility – these are our promises, this is our attitude, this is what we stand for at Stuco!**

# A BRAND WITH HISTORY

CONCEIVED BY PEOPLE. MADE FOR PEOPLE.

Founded in Herzogenbuchsee in 1898 as „Stuber & Co“, our history began with the industrial manufacture of wooden shoes. Today, Stuco stands for high-quality safety and work shoes – developed in Switzerland and manufactured in Hungary.

Since 1993, Claude and Dominic Martin have been steering the fortunes of the family business together with René Bilger. In 1998, a subsidiary was founded in Austria to strengthen customer proximity.

The Stuco founding family from 1898

## AND TODAY?

Since 2024, Dominic Martin has been the sole owner, and we can proudly say that Stuco is still a purely family owned company – independent, value-oriented and with 100% European in-house production.

From left to right: András Kovács (Managing Director, Stuco Kft. Hungary), René Höller (Managing Director, GmbH Austria), Benjamin Kauz (CEO), Jan März (Production Management and Development), Dominic Martin (Owner and Product Developer)

## A BRAND WITH A FUTURE INNOVATION THROUGH TRADITION

Today, Stuco is backed by a dedicated, international team with locations in Switzerland, Austria, Germany and Hungary. But what really sets us apart is not our structures – it's our people. Our employees are committed to Stuco with their hearts, hands and minds. They bring craftsmanship, passion for the brand and a daily commitment to continuous improvement. As a family business, we believe in sustainable growth, social responsibility and fair, respectful cooperation. Those who work at Stuco are not only part of a team, but also actively shape our future.

**Stuco – where responsibility is lived and the future is made.**

# SAFE. FAIR. EUROPEAN. THAT'S WHY STUCO IS COMMITTED TO RESPONSIBILITY

In a world where the pursuit of quick profits often sets the pace, Stuco consciously chooses a different path. Our safety and work shoes are not manufactured in anonymous factory halls, but in our own production facility in Hungary - with heart, responsibility and pride.

„It would undoubtedly be cheaper to have our products manufactured outside Europe. But the mere idea of maximising profits is not our goal,” says Benjamin Kauz, CEO of Stuco.

„We stand for quality, fairness and responsibility – not only towards our customers, but also towards our employees who manufacture the products.”

Stuco has been investing in its own European site since the early 1990s. Our Hungarian production facility is not only modern, but also BSCI and OEKO TEX STEP certified – a clear commitment to social working conditions, fair pay and sustainable business practices.

The people who work for us are not faceless numbers, but part of the Stuco family, Benjamin Kauz continues.

„We know our employees by name, we know what motivates them and we take responsibility for their working conditions. For me, the decision to manufacture in Europe is also a question of attitude, because when we talk about sustainability, we also have to talk about fair supply chains. For us, the two are inseparable,” emphasises Dominic Martin, owner of Stuco.

This attitude is what makes Stuco shoes special. Because every pair not only combines the highest safety standards, but also values such as respect, responsibility and reliability. It is a conscious decision to stay in Europe. A decision that is not the easiest path, but the right one for us. „We want our customers to feel that this product has been manufactured with care – by people who are valued. And that's exactly what quality means to us,” says Benjamin Kauz.

Stuco stands for cooperation on an equal footing – from the factory to everyday working life. And that makes it worthwhile to take responsibility.

«WE MANUFACTURE WITH ATTITUDE.  
FOR PEOPLE, NOT FOR MARKETS.»

Benjamin Kauz, CEO Stuco AG

# SOCIAL JUSTICE

## STARTING WITH US

As a shoe manufacturer, Stuco operates in an environment that is unfortunately all too often confronted with negative social issues such as child labour, discrimination against women and failure to comply with safety standards. Although we operate and manufacture in Europe, we want to do everything we can to prevent these extremely negative developments in our production chain.

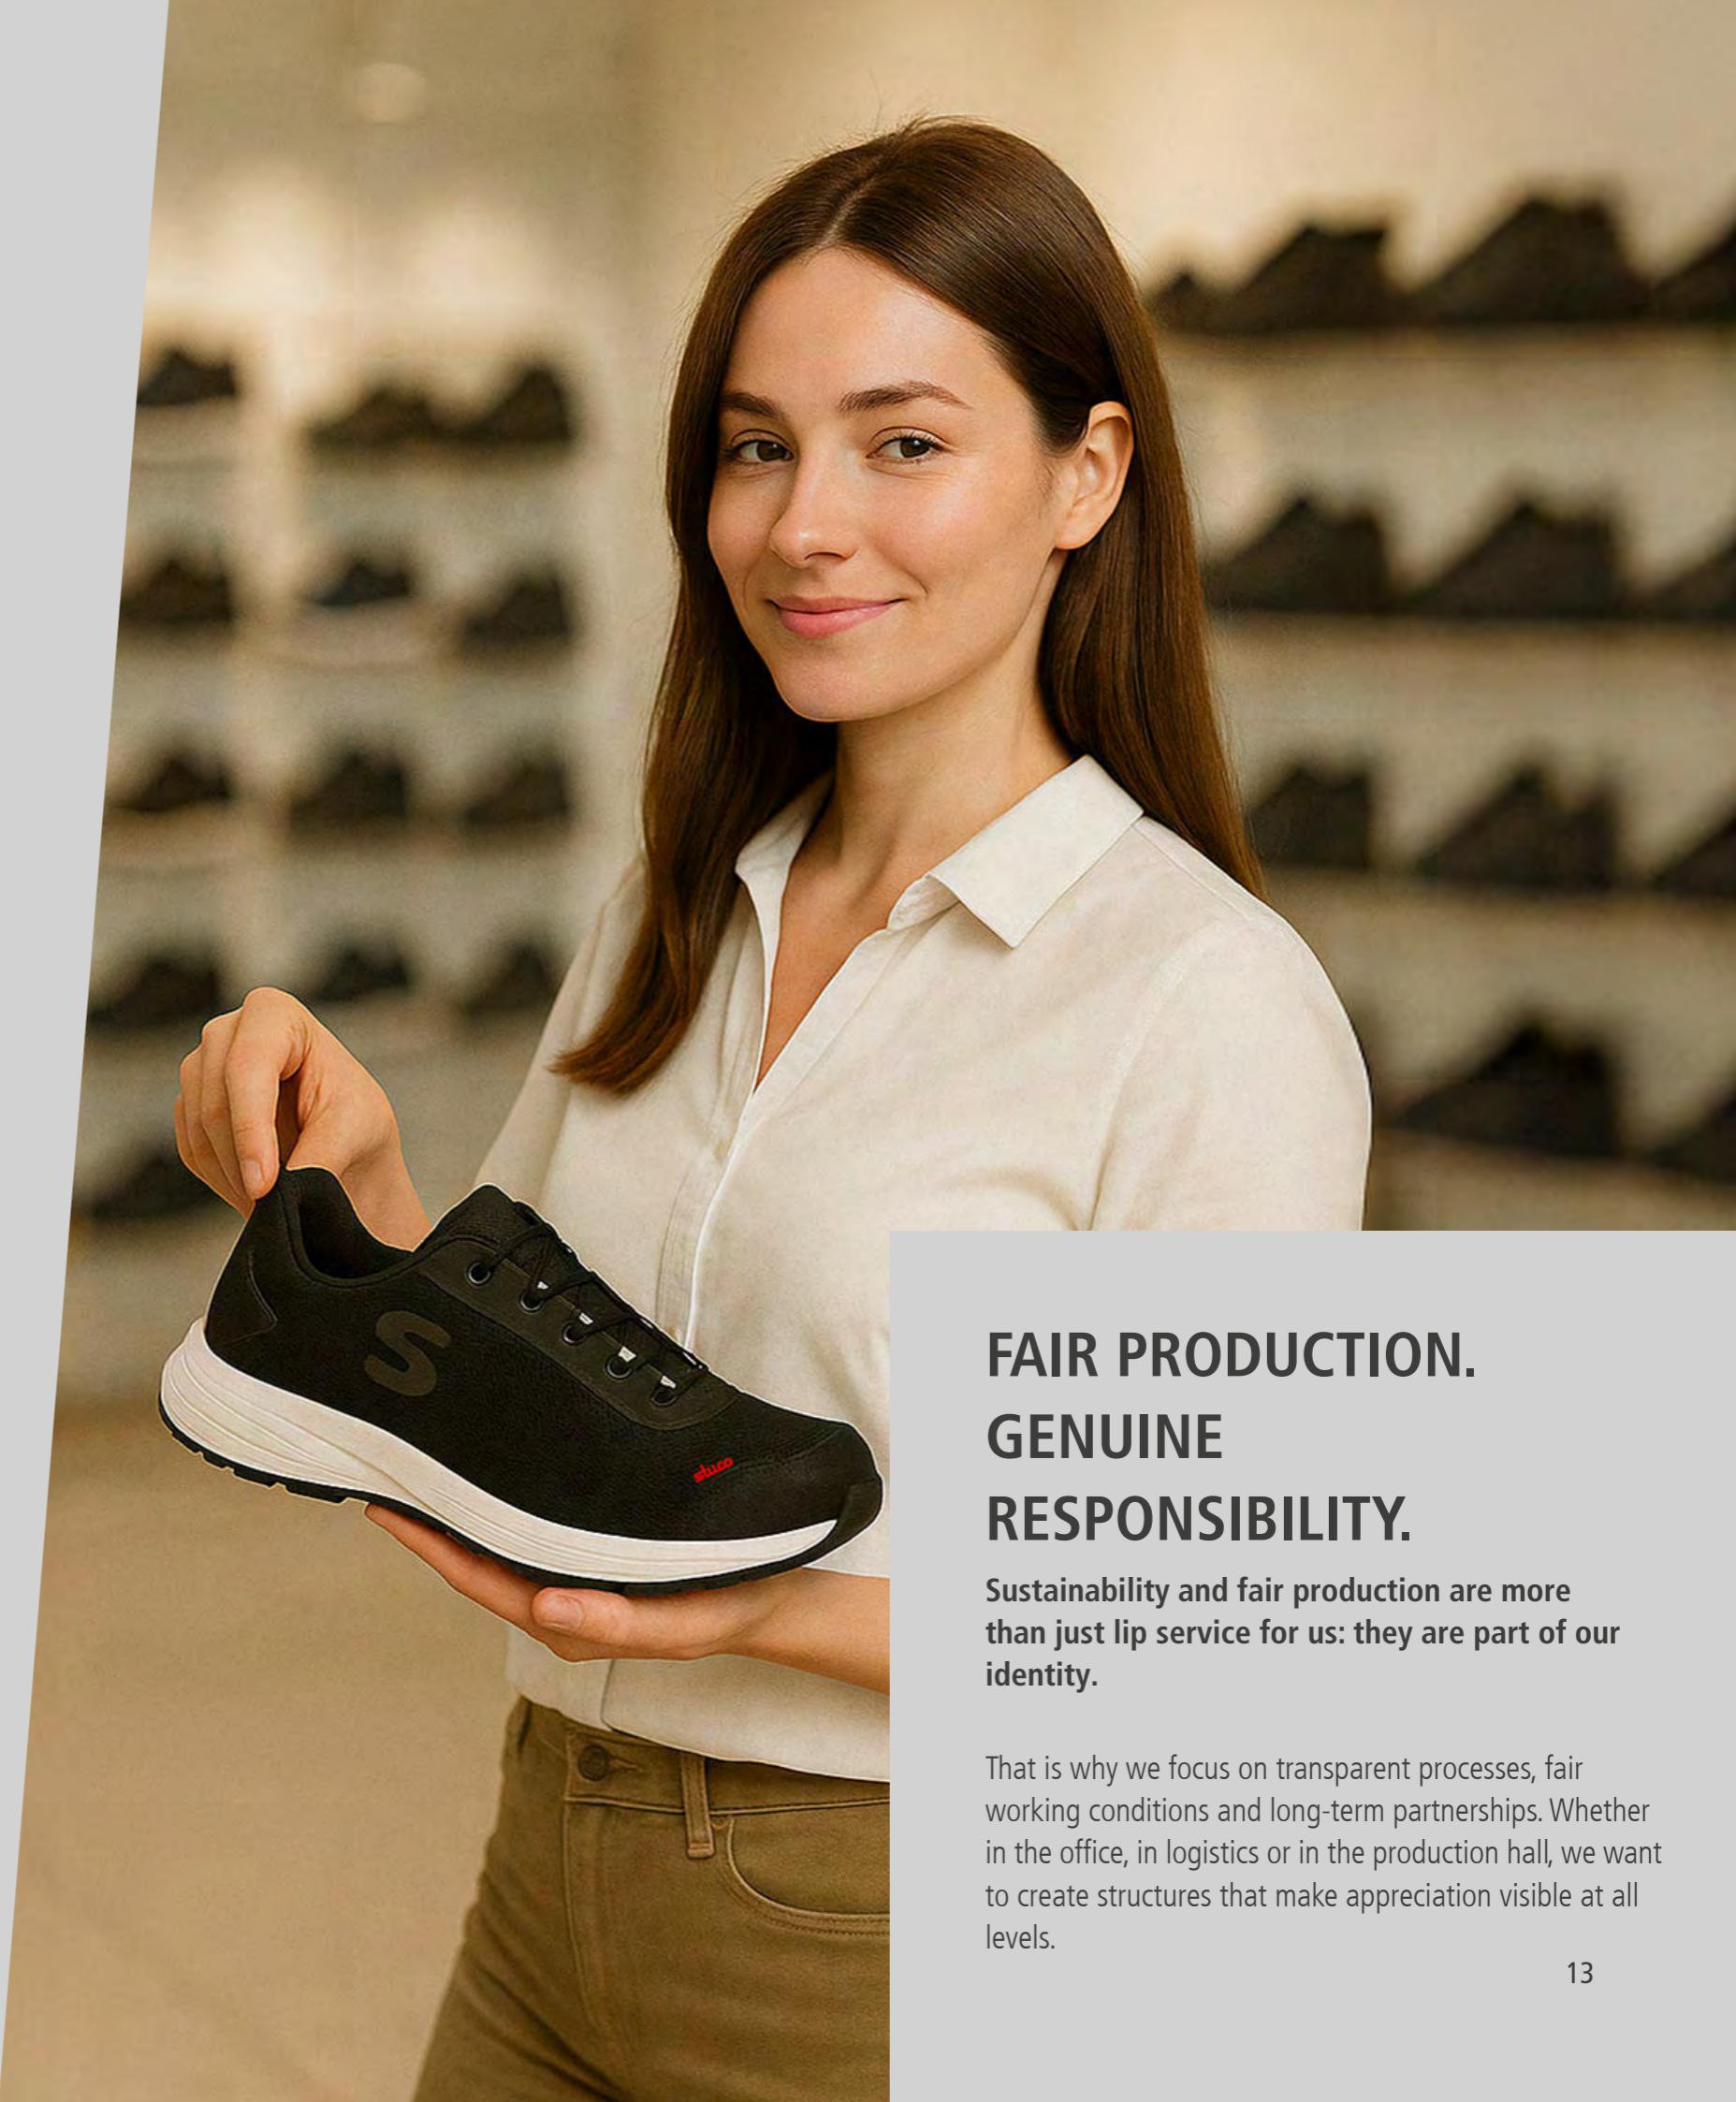

## AMFORI

### THE BUSINESS SOCIAL COMPLIANCE INITIATIVE

As a member of the Global Compact launched by Kofi Annan, amfori BSCI, and thus also Stuco, is committed to accepting a uniform code of conduct based on the UN Declaration of Human Rights, the fundamental labour rights of the ILO and the UN conventions on children's rights and the abolition of all discrimination against women.

The practical implementation of the code of conduct is regularly reviewed by independent audit companies recognised by Social Accountability International. In addition, there are further checks by amfori BSCI and training measures designed to help suppliers improve their social performance.

You can find out everything you need to know about amfori BSCI at [www.amfori.org](http://www.amfori.org).

## FAIR PRODUCTION. GENUINE RESPONSIBILITY.

Sustainability and fair production are more than just lip service for us: they are part of our identity.

That is why we focus on transparent processes, fair working conditions and long-term partnerships. Whether in the office, in logistics or in the production hall, we want to create structures that make appreciation visible at all levels.

## SUSTAINABILITY

# STUCO IS HEADING INTO THE FUTURE, AND WE ARE GOING GREEN

Even during the development of our shoes, we at Stuco attach great importance to sustainable, environmentally friendly materials and suppliers who also meet these criteria. We implement our views on responsible action consistently and with great conviction in our business activities.

## Tested for harmful substances Safety and work according to OEKO-TEX® LEATHER STANDARD and OEKO-TEX® STANDARD 100

The OEKO-TEX® STANDARD 100 and the OEKO-TEX® LEATHER STANDARD stand for tested safety: they guarantee that textiles and leather products have been tested for harmful substances and are harmless to health. For our customers, this means even more trust and confidence in the product. And we are sending a clear signal about our commitment to responsible and sustainable production standards.

# OUR COMMITMENT TO SUSTAINABILITY

More than 250 work steps and over 60 individual parts are required to manufacture a high quality and comfortable safety shoe. From the leather to the rubber and the thread to the eyelets: all individual parts of our certified shoes are successfully tested by OEKO-TEX® in the laboratory for harmful chemical residues.

In addition to OEKO-TEX, our production is certified according to ISO 14001 (environment) and ISO 9001 (quality). We have also been recognised by EcoVadis for responsible corporate governance.

These certifications confirm that sustainability does not end with the product for us. Our commitment to the environment, quality and social responsibility is deeply rooted in our corporate processes.

«ACT LOCALLY,  
THINK GLOBALLY!»

René Höller, Managing Director of Stuco Austria

**WE SET OUR OWN  
STANDARDS**

Our internal environmental guidelines are a binding standard for our daily activities in production, material use and energy supply. We do not rely solely on external standards, but create our own guidelines that combine ecological thinking with economic responsibility.

**GUARANTEE**

# WE STAND BY OUR QUALITY 365-DAY GUARANTEE

At Stuco, quality does not end with the purchase. We offer a **1-year warranty** on all our own products for material and manufacturing defects. Should a defect nevertheless occur, we will find a straightforward solution – either through repair or replacement.

## OUR WARRANTY STANDS FOR TRUST

Wear and tear or improper use are excluded. However, in justified cases, simply return the product to us with proof of purchase and we will take care of it. Because the satisfaction of our customers is our top priority.

## EXCHANGE? NO PROBLEM.

Whether too big or too small: we will exchange unworn items free of charge. And if a product does not meet your expectations, you can take advantage of our **10-day moneyback guarantee**.

«I'VE BEEN USING THEM FOR OVER A YEAR NOW AND THERE'S NO END IN SIGHT. I'VE NEVER HAD SUCH A COMFORTABLE AND DURABLE SAFETY SHOE.»

Stuco customer, X-Track owner

«UNIQUE COMFORT COMBINED WITH THE HIGHEST QUALITY – THAT'S WHAT WE STAND FOR WITH OUR NAME.»

René Höller, Managing Director, Austria

## TECHNOLOGIES, INNOVATIONS AND STANDARDS

#### Air-FlowteX

AFX lining, Air-FlowteX, ensures natural air circulation and a comfortable climate inside the shoe. The 3D spacer fabric creates a space between the foot and the upper material of the shoe, which provides excellent breathability.

#### Lambskin lining

Shoes with genuine lambskin lining. Genuine lambskin ensures a warm climate inside the shoe without sweating.

#### Vegan

Free from materials of animal origin. Products with this icon are made from 100% plant-based or synthetic materials.

#### Women's shoes with optimised last shape

Women's shoes with a specially optimised last shape. Particular attention has been paid to the ergonomics and foot shape of women in these shoes. The lasts are narrower than in men's or unisex shoes, especially in the heel area.

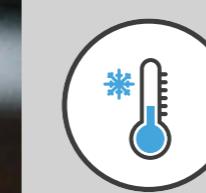

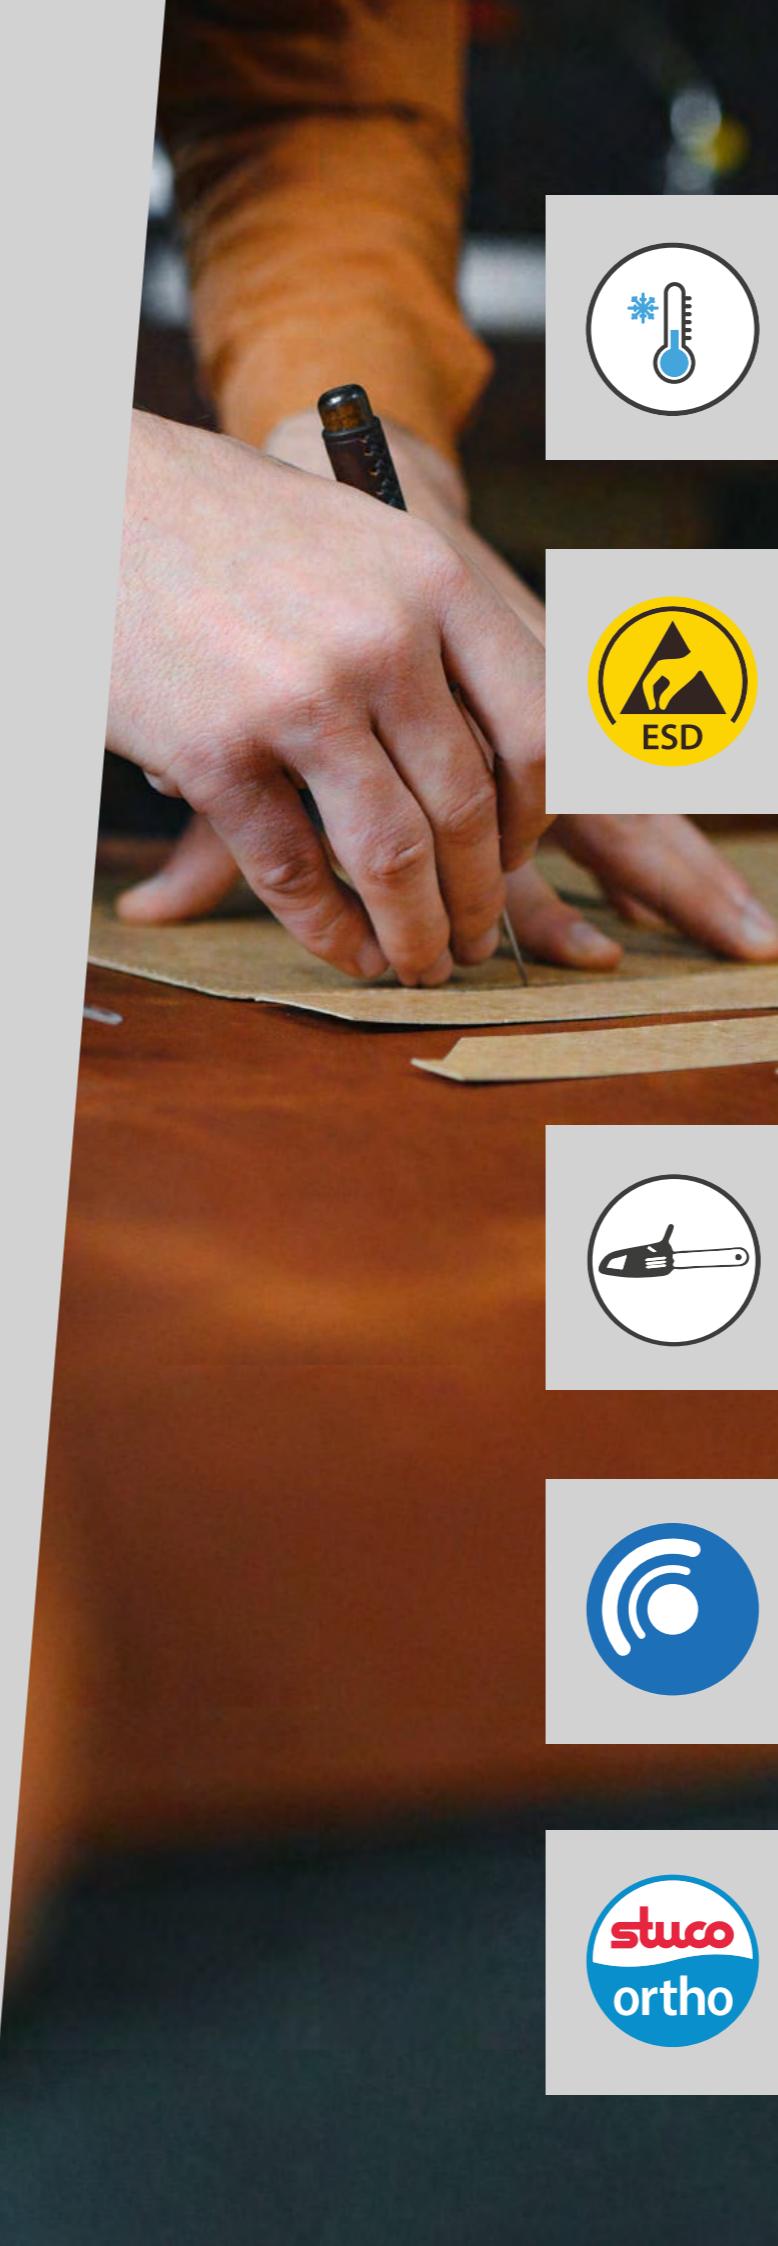

#### Aluminium alloy toe cap

Toe cap made from a special aluminium alloy. The special ergonomic and large shape as well as the low weight ensure high comfort in safety shoes. Aluminium proves to be a great advantage, especially at low temperatures.

#### Stuco Soft-Pad heel cushioning

In addition to regular heel cushioning, these shoes are equipped with Stuco Soft-Pad heel cushioning or another special cushioning system. These shoes are particularly suitable for hard surfaces.

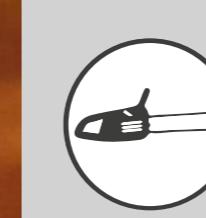

#### Textile warm lining

Provides excellent thermal insulation for lasting, comfortable warmth, high breathability and first-class wearing comfort.

#### ESD symbol

Antistatic shoes with ESD protection up to a maximum system resistance of 35 M-ohms. Shoes with this symbol meet the requirements of EN 61340-4-3. Normal antistatic safety shoes can have a maximum resistance of 1000 M-ohms. Stuco offers a comprehensive range of shoes with a lower maximum resistance that meet ESD requirements or BGR 132. Certificates or declarations of conformity for the respective models are available on request.

#### Cut protection

Cut protection shoes for working with hand-held chainsaws. The integrated cut protection fabric offers a high level of protection for the foot when working with chainsaws in accordance with EN ISO 17249.

#### Stuco AirTubeless sole

Shoes with the unique Stuco AirTubeless sole. Experience the most natural and gentle cushioning since safety shoes were invented.

#### Stuco orthopaedic fitting

Certified orthopaedic adjustments in accordance with EN ISO 20345 and ÖNORM Z-1259 are possible for these shoes. Adjustments are carried out exclusively by specialist companies. Two variants are possible.

# SAFETY AND WORK SHOES

SB S1 S2 S3 S4 S5 S6 S7

Safety shoes are shoes with toe caps that can withstand a test energy of 200J and a pressure of 15kN. Tested in accordance with EN ISO 20345.

Basic and additional requirements for <b>Class I</b> footwear made of leather or other materials, except for moulded or vulcanised footwear	Safety footwear According to EN ISO 20345:2022	Occupational footwear According to EN ISO 20347: 2022
Basic requirements and resistance of the toe cap to impact and pressure	<b>SB</b> 200 joules / 15kN	<b>OB</b> None
Additional requirements: Closed heel area, antistatic, energy absorption capacity in the heel area	<b>S1</b>	<b>01</b>

# 3-LAYER LAMINATE WITH PORELESS HIGH-PERFORMANCE MEMBRANE WATERPROOF. BREATHABLE. DURABLE.

Our innovative shoe lining is based on a three-layer laminate construction with a nonporous, water vapour-permeable polymer membrane. This technology combines optimal weather protection with high wearing comfort.

## HOW THE MEMBRANE WORKS:

- The **non-porous structure** prevents water from penetrating - even in heavy rain or under high loads.
- At the same time, the material allows **water vapour** (e.g. sweat) **to be transported** to the outside.
- The result: **Dry feet and a comfortable foot climate** - all day long.

## YOUR ADVANTAGES AT A GLANCE:

- ✓ 100% Waterproof
- ✓ High breathability
- ✓ Excellent tear resistance Durably
- ✓ Hard-wearing – even with intensive use

## ONLY THE BEST GOES INTO THE SHOE HIGH-QUALITY MATERIALS FOR THE HIGHEST DEMANDS

A high-quality product begins with the selection of first-class raw materials. That is why we are uncompromising when it comes to quality in our safety and work shoes – from the first cut to the final finish.

### LASTING COMFORT: OUR LININGS WITH A FEELGOOD FACTOR

The inner lining of our shoes is made of breathable, skin-friendly materials. Whether it's the best genuine cowhide leather or the highest quality textiles – our materials regulate the climate inside the shoe, minimise heavy perspiration and ensure a comfortable fit even after long working days.

### QUALITY YOU CAN SEE: THE FINEST TEXTILE MATERIALS AND UPPER LEATHER

Only selected, durable fabrics and finely crafted upper leather find their way into our models. Abrasion-resistant, easy to care for and visually appealing at the same time – so that your shoes look as professional as you work.

### SAFE. LIGHTWEIGHT. NICKELFREE: TOE CAPS AND FITTINGS WITH RESPONSIBILITY

Our toe caps, eyelets and hooks are not only robust and durable, but also guaranteed nickel-free. This not only protects your feet, but also your skin – and is a clear commitment to health and safety.

### SAFETY MEETS STYLE: BECAUSE FUNCTION CAN ALSO LOOK GOOD WITH RESPONSIBILITY

What would top quality be without a design that impresses? Our shoes combine state-of-the-art technology with a contemporary look – for everyone who values safety without compromising on style.

# WHAT'S INSIDE IT'S WHAT'S INSIDE THAT COUNTS

# INNOVATION MEETS ERGONOMICS THE STUCO SOLES

## STUCO AIRTUBELESS – MORE THAN JUST AIR

Experience the most natural and gentle cushioning since safety shoes were invented. Our unique Stuco AirTubeless sole uses air cushioning and offers many advantages:

 Up to 30 % less pressure on the sole of the foot for a softer gait and potential protection of the joints.

 Protects the back and can prevent back pain.

 Reduces impact forces by up to 55 %, increasing comfort.

 Up to 50% higher thermal insulation than conventional outsoles.

## EVERY STEP COUNTS COMFORT IN EVERYDAY WORK

Our feet work hard every day and carry us throughout our entire lives – often under extreme conditions at work. This is exactly where Stuco comes in: with state-of-the-art outsoles that make no compromises. Because not all soles are created equal – so it's high time to give your feet the best. Our outsoles stand for maximum cushioning, secure grip and noticeable comfort. Stuco is constantly breaking new ground in this area: for example, with the innovative AirTubeless rubber sole. The full-surface air cushioning system provides real relief with every step.

### PURE ERGONOMICS

The ergonomic, rounded shape ensures minimal deformation of the sole when the foot rolls. The shoe is protected from severe deformation in the toe cap area, does not bend and therefore does not cause pressure points.

The energy absorption in the heel area of 45 joules is 125 % higher than the minimum requirement and ensures a soft step and protects the joints and back.

### SOLES THAT THINK FOR THEMSELVES

Our outsoles are made from highly developed, non-slip special compounds that ensure maximum safety and durability – even under the most extreme conditions. Every step becomes an expression of stability and confidence.

### PUNCTURE PROTECTION OF YOUR CHOICE: STEEL OR HIGH-TECH FABRIC

We offer two high quality options for puncture protection: robust **steel midsoles** for maximum mechanical protection or **non-metallic fabric inserts** that are particularly light and flexible. Both versions are tested according to the latest standards and offer reliable protection - depending on the area of application and personal preference.

## SIZE CHART

# WHAT SUITS YOU? HOW TO FIND YOUR SHOE SIZE

Place both feet (without shoes) on a piece of paper and trace around them. Hold the pencil vertically! Then measure both foot lengths from A to B in centimetres. If the measurements differ, use the larger one.

## SIZE CHART

Foot length A-B in cm	Shoe size EU	Shoe size UK
22.3	35	2.5
23.0	36	3.5
24.3	37	4
25.0	38	5
25.6	39	6
26.6	40	6.5
26.3	41	7
27.0	42	8
27.6	43	9
28.3	44	9.5
29.0	45	10.5
29.6	46	11
30.3	47	12
31.0	48	13
31.6	49	13.5
32.3	50	14.5
33.0	51	15
33.6	52	16

## PUNCTURE PROTECTION – NOW EVEN CLEARER

Everything used to be simpler - but not necessarily better: in **EN ISO 20345** and **20347 (2011)**, every puncture-resistant sole only had to withstand a load of **1100 newtons**. Whether steel or high-tech fabric - the testing was the same. However, this often led to different results between metallic and non-metallic materials. The new standard provides clarity and transparency in this area. There are now three classes of puncture resistance, which are clearly distinguished from one another.

The new standard provides clarity and transparency in this area. There are now **three classes of penetration resistance**, which are clearly distinguishable from one another.

These classes also apply to **S1P, S1PL, S1PS, S5, S5L, S5S, S7, S7L, S7S** for safety footwear and to **O1P, O1PL, O1PS, O5, O5L, O5S, O7, O7L, O7S** for occupational footwear.

**S3 / P**

- Classic **steel sole** (4.5 mm test nail >1100 N).

**S3L / PL**

- **Non-metallic insert** (e.g. Kevlar®, para-aramid) tested with a 4.5 mm test nail, no puncture at 1100 N.

**S3S / PS**

- **Non-metallic insert** tested with 3 mm test nail >1100 N average value, no individual value < 950 N.

## AIR FORCE LOW ITEM NO. 22.006

**SIZE 38 - 48**

- **Comfort footbed insert**
- Upper material: Grained cowhide leather

# UNICOindividual EYE PROTECTION THAT FITS!

Employees with good vision are a key factor for success: they work more safely, with greater concentration and more efficiently. With high-quality, individually corrected safety glasses from Unico, you not only increase workplace safety through precise vision correction, but also improve the health, motivation and performance of the wearer.

All UNICO models meet the requirements for personal protective equipment in accordance with PPE Regulation (EU) 2016/425. Each pair of prescription safety glasses comes with a personalised EU declaration of conformity, which is handed to employees when they receive their glasses.

Your advantages at a glance:

- Greater ability to concentrate
- Less rapid fatigue
- More precise, safer working thanks to clear vision
- Increased motivation and productivity

## SERVICE AND ADVICE

# PERSONAL, UNCOMPLICATED AND CLOSE BY ADVICE THAT FITS

Whether on site, by telephone or digitally: at Stuco, your needs are our focus. We provide you with individual advice and work with you to find the right solution – for security that fits.

## VIRTUAL SHOWROOM

Browse through our products and solutions in our virtual showroom: intuitive and available around the clock.

## WE ARE HERE FOR YOU

Whether you need advice, have a product query or require a special solution: please contact us.

📞 +41 62 956 5010

✉️ info@stuco.ch

## HAVEN'T FOUND WHAT YOU'RE LOOKING FOR YET?

Then get in touch with us. Together, we will find a solution that really works. Personalised, professional and on equal terms.

## ON-SITE FITTING WE BRING THE ADVICE TO YOU

Invite us to your premises! We will deliver the selected shoe models and let your employees try them on straight away. If the shoes fit, they can be worn immediately and taken away.

Our expert staff will bring along a selection of safety shoes for you to try on, chosen to suit your needs. Your employees can try on the models directly on site and receive personalised, professional advice from our Stuco experts.
